

# DAVIS HOCHSTATTER

Forward Deployed Engineer · AI-Enabled Software & Data Engineer

Portland, OR · davishochs@gmail.com · 512-750-9442 · linkedin.com/in/davis-hochstatter/

Engineer first, AI-native in practice. For nearly five years I have been embedded with a Fortune 500 client as technical owner of a platform that routes tens to hundreds of millions of messages, building its data pipelines, APIs, and AI agents. I use Claude, Codex, and Cursor daily to move fast in any language, backed by SQL, backend fundamentals, and release discipline that keep that speed safe for production.

## EXPERIENCE

### Epsilon Data Management

Oct 2021 – Present

Senior Software Engineer · *Embedded platform lead, Fortune 500 global hospitality client*

Remote

- **Own a production platform at scale.** Technical owner and escalation point for the client's Adobe Campaign Classic instance, which routes tens to hundreds of millions of emails, SMS, and push messages across 10+ marketing initiatives.
- **Built AI agents to fill platform gaps.** Agents that analyze prod and dev workflow XML to give Adobe Campaign, which lacks accessible version control, a Git-like state; plus a documentation agent for consistent docs.
- **AI-accelerated, guardrailed delivery.** Use Claude, Codex, and Cursor daily across JavaScript, Java, Python, and SQL; review, QA gates, and release governance keep AI-assisted output production-grade.
- **End-to-end data engineering.** Built workflows that ingest, transform (ETL), and push data to external platforms, optimizing the client's Adobe infrastructure and feeding marketing analytics; maintain and enhance the workflows behind 35M+ daily emails, backed by extensive SQL analysis of campaign audience populations.
- **APIs and platform extensibility.** Built APIs into Adobe Campaign so customers can interface with it (e.g., a pre-arrival survey) and data can be piped to external platforms; wrote custom JavaScript libraries that extend it.
- **Architecture and client partnership.** Lead architecture for new marketing initiatives; steer non-technical stakeholders to best-practice designs, align other client vendors to the future-state platform, and explain risk and trade-offs to executives.
- **Lead and grow engineers.** Lead the platform team, including offshore engineers; raised campaign processing efficiency 25% via complex data integrations and feature delivery; coach on Adobe Campaign, workflows, and data architecture.
- **Reliable releases, faster onboarding.** Shipped 20+ production releases with zero critical incidents by maturing CI/CD, QA gates, and release governance in Azure DevOps; cut new-developer onboarding time 30% with better documentation.

Techson IP · Chief of Staff, Administration · Austin, TX

Nov 2018 – Jul 2021

## CORE SKILLS

### AI-Enabled Engineering

Claude · Codex · Cursor · Copilot · AI agent development · AI-assisted coding, code review & documentation · Workflow automation

### Backend, APIs & Full-Stack

JavaScript / Node.js / Express · Java · Python · REST API design & integration · Postman · Middleware · React · Vue · HTML/CSS

### Data Engineering

SQL / PostgreSQL · ETL & data extraction · Integrations to external platforms · Audience analysis

### Platform & DevOps

Adobe Campaign Classic · Azure DevOps · Azure · AWS · Git · CI/CD · Unix / Linux

### Leadership

Architecture · Executive communication · Mentorship · Release governance · Technical writing

## EDUCATION

Western Governors University · BS Software Engineering

Expected Dec 2026
