

DAVIS HOCHSTATTER

Portland, OR · davishochs@gmail.com · 512-750-9442 · [linkedin.com/in/davis-hochstatter/](https://www.linkedin.com/in/davis-hochstatter/)

Outcome-focused, AI-enabled engineer who applies assistants and automation to deliver production-ready solutions while holding the line on quality, reliability, and operability. Skilled orator with non-technical stakeholders: translates architecture, risk, and trade-offs into clear narratives so teams reach decisions with shared context and accountability. Technical lead who improves delivery predictability by unblocking developers, clarifying technical direction, and keeping complex programs tied to business goals.

EDUCATION

Western Governors University
BS Software Engineering

Remote
Feb 2025 - Dec 2026

EXPERIENCE

Epsilon Data Management
Senior Software Engineer

Remote
Oct 2021 - Present

- Enabled reliable, high-volume personalized campaigns for Fortune 500 clients by owning end-to-end development, release management, and delivery for enterprise marketing automation solutions.
- Raised campaign processing efficiency 25% by directing an offshore engineering team through complex data integrations, feature delivery, and hands-on execution.
- Strengthened stakeholder trust and delivery outcomes as client-facing technical lead—translating business needs into scalable solutions with clear communication, solution guidance, and consistent execution.
- Shipped 20+ production releases with zero critical incidents by maturing CI/CD, QA gates, and release governance in Azure DevOps across the SDLC.
- Cut new-developer onboarding time 30% by upgrading technical documentation and communication practices, tightening alignment across client and internal teams.
- Drove seamless cross-industry campaign execution by collaborating with client stakeholders, marketing, product owners, and engineers from intake through go-live.
- Improved team velocity and solution quality by coaching engineers on Adobe Campaign development, workflow optimization, and data architecture.

Techson IP
Chief of Staff - Administration

Austin, TX
Nov 2018 - July 2021

- Achieved 100% on-time delivery of research initiatives by directing internal operations and full project lifecycles under structured program management.
- Improved client decision-making by delivering marketing sites, interactive dashboards, and Tableau/Alteryx analytics with actionable performance insight.
- Supported new client wins through technical presentations and demos, with rigorous QA on deliverables to protect brand and pipeline quality.
